May, 2014

From The President

Greetings Eagle Members,

Everyone talks about the weather, but no one does anything about it. We have not had a very good start to the season. I have been out two or three time but fought the wind, temperature or rain each time. The field is very wet, but looks nice and green. I'm sure it will get better, and I hope soon.

Thanks to Jim McCoy for putting down weed killer and fertilizer. He may be mowing every other day if the rain keeps coming, but the field will look nice.

Construction has started under Gracemont, so be prepared for some inconvenience on the way to the field. One Lane with traffic lights to control flow. Not too bad, and really nothing to be done about it.

Believe it or not only two more meetings before the July fun fly. I don't think we need a sign up sheet, we will need every club member to participate in order to pull it off. I'm sure we will need some discussion about who will do what, so be sure to be at the next meeting to make your voice heard.

If you have not purchased raffle tickets, please do so at the next meeting. If you have, will you take some more. We can use the income for the treasury.

Our next meeting will be at the Lakeside Center on Wednesday the 21st. I look forward to seeing everyone.

Scott

From Your Editor

Hi Fellow Eagles,

Rain, Rain go away and don't come back on flying days. Enough with the freaking precipitation already.

OK, first some important notes..

1. Flying season is here check your radios and batteries carefully before the first flight of the year.
2. The July Fun-Fly is only two months away. WE WILL Need EVERYBODY'S help to pull it off. We have lost several members and those jobs will have to be done by the rest of us.
3. Sell raffle tickets. We will need the money later in the year.
4. This meeting will be held at Lakeside. For the rest of the summer we will hold the meetings at the field with our customary pot luck cookout.

With the really un hospitable weather we are having, it's tough to get into the flying mood. But summer is just around the corner so I hope we have a lot of activity this year.

I will be bringing my frequency spectrum analyzer to the field to see if there are any unusual signals. Of course this doesn't guarantee that we don't have a problem, but if there is something amiss it should show up. I believe that anyone flying with DSMX, DSMM, or FASST radios will not experience any problems. But then I believe in Santa Clause too, so take that for what it's worth.

Keep em' Flying!!
